

Freeview Changes

Changes are being made to the way some channels are broadcast on Freeview. You may need to retune your television equipment to continue watching programmes when these take place.

On **19th August 2020** viewers who receive their signal from the Douglas transmitter will need to retune. Further information on how and when to retune will be publicised by Digital UK closer to the time.

For further information and updates on the 700MHz clearance, visit the [Freeview](#) website.
